

## CRANE AND HOIST INSPECTIONS

**Morris Material Handling provides** a comprehensive assessment of all your crane and hoist equipment, delivered in a simple and easy-to-read format using our proprietary ProCare® inspection software. Technicians enter inspection data directly into their computer for accurate and fast reports and repair proposals.

### Inspections Include:

- Identified safety deficiencies are brought to your attention before the inspector leaves your site
- Clear, concise and actionable reports
- Deficiencies organized from most serious (safety) to least serious (general maintenance)
- Digital photos of most serious problems

### Certified Inspectors:

Morris Material Handling inspectors are certified at our Training Institute in Wisconsin. Training goes beyond the guidelines of OSHA and CMAA. Each inspector performs written and practical exams and is re-certified every two years.

### Benefits of our Inspections:

- Reliability—minor problems can be corrected before they lead to a major breakdown
- Fast turnaround—complete report and repair proposals, showing all necessary parts and labor, are typically available within three to five days.
- Work can be scheduled at a time that will not interrupt production
- Comprehensive parts inventory available via our extensive network of service branches.
- Cross reference to regulations designed to ensure compliance.
- Lower your total cost of crane ownership
- Assist with safety and productivity.

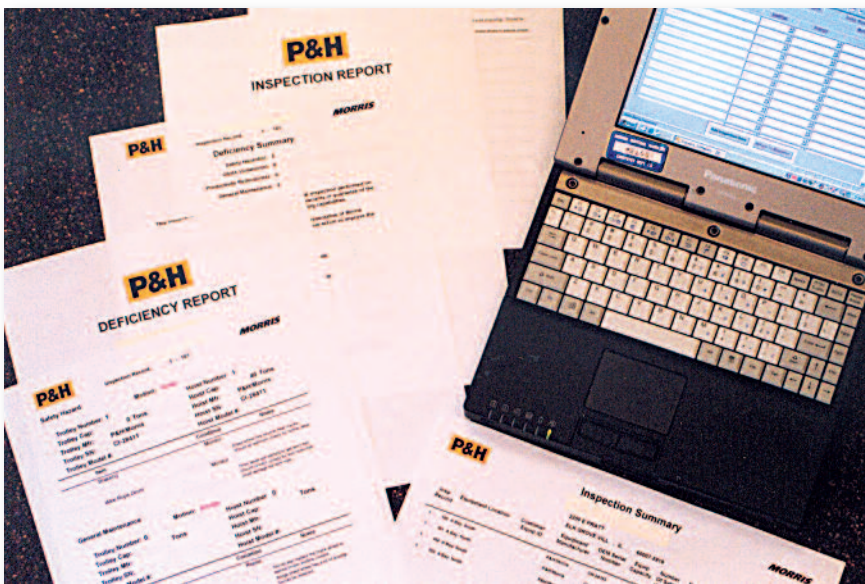

## CRANE AND HOIST INSPECTIONS

### ProCare® Inspection System

Certified inspectors carry rugged Panasonic Toughbook® laptop computers.

Reports are clear, concise and actionable. Printed on site or e-mailed. Inspection records are stored in our database and available online.

### ***DID YOU KNOW?***

#### **U.S. & Canadian Crane Regulations Require:**

- Complete inspections of an overhead crane once every 12 months, and as often as monthly depending upon its service class and environment.
- Monthly hook inspections with a certification record.
- Monthly hoist chain inspections with a certification record.
- Monthly wire rope inspections with a certification record.
- Standby cranes to be inspected semiannually.
- A crane that has been idle for 6 months or more shall be given a complete inspection prior to placing into service.
- A preventive maintenance program based on the crane manufacturer's recommendations shall be established.
